Sep 24, 2025

To whom it may concern,

I had the opportunity to work with Stepan Turchenko for over three years, during which he served as our lead developer. Stepan was instrumental in building our product almost from the ground up, contributing across the full stack — including React Native, Node.js, and other technologies.

He consistently put in hard work and dedication, and his contributions helped us move from early ideas into a working product that our customers could use. Stepan took ownership of both front-end and back-end development and was able to deliver across a wide range of technical areas.

I am confident that Stepan will bring strong technical knowledge and determination to any future role.

Sincerely,
Elad Katz, Chief Product Officer & Founder, Aspect Health
